

Building a Greener, Sustainable India with 100,000 MW of Renewable Energy.

Dedicating 100,000 MW of Renewable Energy to the country on the eve of our 75th Independence Day.

The Renewable Energy sector of the country takes immense pride to celebrate this achievement. Nation building is a key aspect of our industry and creating a better world for our future generations is our dream. On behalf of all the Independent Power Producers, Original Equipment Manufacturers, MSME partners, Service partners and our teams, we would like to thank the Government of India, MNRE, State Governments and the people of India for supporting and empowering us. Together, we dedicate ourselves to making India's Renewable Energy future a beautiful reality.

- World's 4th largest installed Renewable Energy (RE) capacity (Installed capacity: 100,000 MW, under implementation: 50,000 MW, under tendering: 27,000 MW).
- Installed RE capacity (including large Hydro): 146,000 MW, under implementation: 62,000 MW, under tendering: 27,000 MW.
- World's 5th largest solar installed capacity with 45,200 MW.
- World's 4th largest wind installed capacity with 39,600 MW.
- Other renewable energy (Bio energy & Small Hydro) installed capacity: 15,400 MW.
- Around three times increase in installed RE capacity in the last 7 years.
- Seventeen times increase in installed solar capacity in the last 7 years.
